ITS TRANSMISSION OR THE DEVELOPMENT OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

Reel # 50X1-HUM 401

50X1-HUM

1. On 14 or 15 January and on 17 or 16 respectively, the advanced detail and the bulk of a training battalion, presumably coming from the Bautzen area, arrived at Neubrandenburg Airfield.¹ The 50X1-HUM of the battalion was about 450 cadre personnel including:

the commander : a major who served for 30 years as a soldier;

the cadre officer : Captain Meyer (fnu-)

the administration officer: a captain

The unit was organized into the battalion staff without headquarters company, 1st and 2nd companies, and the 1st and 2nd Tng companies, each headed by a company commander, presumably 1 captain and 3 first lieutenants. The 1st and 2nd Co's were billeted in buildings referred to by U 6 and U 9, the 1st and 2nd Tng Co's in buildings U 3, while the staff was housed in administrative building Vw 1.² It was planned to reinforce the unit and to improve the billets as for as necessary. Plans were available, but the beginning of construction work was postponed until early 1959 due to financial reasons.³

2. Each training course was planned to take care of about 150 soldiers. The soldiers of the motor vehicle and training companies were scheduled to be trained for 4 weeks and 6 weeks respectively. Between 23 and 27 January 1958, the first 150 recruits arrived with the battalion. All of them were newly enlisted personnel, some of whom had not yet been sworn in. The soldiers had gone through a general medical inspection but were again examined with the battalion to see whether they were fit for driving (color-blindness, eye and ear defects and disease of the heart). They were, however, not examined on whether they were fit for flying. In general, their state of health was good.

3. The quarters were in poor conditions, sanitary measures were taken to be desired. There was no warm water, and the drinking and wash water was cloudy and brackish. A lack of cleanliness was a problem with the entire personnel.
4. A major and a number of trucks was available at the airfield, the parking place of which was not determined. Generally only 5 to 6 trucks were used for training purposes.
5. For the time being only the northern gate was used and was guarded by 1 MCO and 6 EM. The oil dump in the north was still in existence. No motion picture theater and theater (K 3) were available. The administrative building Vw 1 was enlarged to the north for housing a dispensary. The installation referred to as P 1, U 2, 3, 6, 7, 8, 9 and Pu (water works) were available.²
6. The soldiers of the motor vehicle companies received training in truck driving, maintenance of vehicles and small repairs, while the training companies presumably received theoretical instruction, on which no details were known.
1. Comment. This information confirms the transfer of the instruction and training battalion from Bautzen. 50X1-HUM
2. Comment. For location and kind of the buildings, see Annex.
3. Comment. in the course of 1968 the battalion was reinforced to regimental strength.

Neubrandenburg Airfield

Status: September 1957

1. Location

- a. 53° 36' 10" N / 13° 18' 40" E
- b. 6km northeast of Neubrandenburg
1.5 km east of Trollenhagen
- c. 68 meters above sea level
- d. Plane table sheet Nos 2345/46 and 2445/46.

2. Possibilities of Approaching and Observing the Airfield

The airfield cannot be seen very well from the south because it is hidden behind a hill. The woods where the buildings are located are guarded by sentries. The airfield area can be observed from the north and the east. In the north, the entrance to the landing field is open; it is, however, not quite clear how far the wire fence extends in the north. In the south, only remainders of old fences were observed.

3. Airfield Installations

Abbreviations Used	Item	Reconnaissance Results	Reconnaissance Requirements
	Landing field	sod with drainage system	
A	dispersal areas	see sketch	
Ba	railroad connection		
	supply station	Neubrandenburg
